## A&E SPECIFICATION

The DiGiCo SD11 shall have one worksurface section of 12 faders, with 3 layers of 4 banks. These faders can be assigned to control any of the channel types. The console shall be capable of 48 input channels, 24 Aux/Sub-group Busses, a LR/LCR Master Buss, 8 VCA style or mute group style Control Group channels, 2 Solo Busses, and an 8 input x 8 output full processing Matrix. All processing paths shall have full processing including Tube emulation, Dynamic EQ and Multiband Compression. Tube emulation, Dynamic EQ and Multiband Compression shall be available on every channel and Buss on the console. All processing shall be internal and FPGA-Based. An internal FX rack with 6 stereo slots shall allow users to pick from 34 different FX. An internal set of 12 32-band GEQs shall also be accessible.

A 15" (38cm) LCD high-resolution touch screen shall be provided to show either channel strips or the Master screen. The view selection shall be controlled by a physical button on the worksurface. There shall also be a physical control on the worksurface to control the master level so that it can be accessed at all times.

Physical controls on the master section of the worksurface shall allow control over basic snapshot functions, control over basic Solo functions, and there shall be a dedicated hardware channel strip to the right of the touchscreen, allowing control over filters, EQ, dynamics and insert points. 7 quick select buttons shall be on the master section to allow easy reassignment of the underscreen rotaries. There shall also be 8 user-assignable macro buttons on the worksurface. The user shall also be able to program macros that can be triggered with fader movements, GPI, MIDI and keyboard function keys.

The rear panel shall have 16 Mic/Line inputs, 8 line outputs, 1 AES/EBU input (2 channels) and 1 AES/EBU output (2 channels). It shall also have 1 Ethernet port for connections to D-Racks, one set of MADI I/O for connections to MADI devices, and external Workclock I/O. The other connectors on the rear of the console shall be 2 GPIs, 2 GPOs, MIDI In, Thru and Out, 2 USB ports, a VGA port, an ethernet port and one port for an external link.

There shall be a Waves SoundGrid option providing 64 inputs and 64 outputs to the SoundGrid Network at 48kHz and 96kHz. There shall also be an Optocore option, providing 504 additional audio paths at 48kHz and 96kHz. The Optocore connector type shall be chosen from HMA, OpticalCon or ST. The Optocore Mode shall be chosen from MultiMode or SingleMode.

There shall be an i Software option available that shall increase the channel counts to 80 input channels, a 12 input x 8 output full processing matrix, and increase the number of internal stereo FX processors to 8.

There shall also be a Broadcast Software option available that shall provide Surround Busses, a Monitor Matrix, Backstop PFL and Mix Minus Busses. The channel counts of the Broadcast Software shall match those of the injected Software (excluding the surround Buss option).

The dimensions of the SD11 shall be: 496.8 (w) x 638.7 (d) x 253 (h) mm  
 The weight of the SD11 shall be: 24kg  
 The DiGiCo SD11 shall be supplied with a dust cover.
